AMIT MAHIDA

Senior Full Stack Architect | SaaS Platform Architecture | Angular, Node.js, Java & AWS

Vadodara, Gujarat, India | +91 89057 21492 | amit.mahida9292@gmail.com | amitmahida.dev

PROFESSIONAL SUMMARY

Senior Full Stack Architect and Engineering Leader with 11+ years of experience designing and delivering enterprise applications, multi-tenant SaaS platforms, and scalable frontend/backend systems. Expertise across Angular, React, TypeScript, Node.js, Java/Spring Boot, REST APIs, PostgreSQL, AWS, Docker, CI/CD, microservices, system design, and performance engineering. Proven record of technical leadership, architecture ownership, workflow automation, product delivery, and mentoring engineering teams.

CORE EXPERTISE

Architecture & Leadership: Solution Architecture, System Design, Technical Roadmaps, Team Leadership, Mentoring, Agile Delivery, Stakeholder Management

Frontend: Angular, React, TypeScript, JavaScript, RxJS, NgRx, Nx Monorepo, Ionic, HTML/CSS, Tailwind, Material UI, Performance Optimization

Backend & Platform: Node.js, NestJS, Java, Spring Boot, REST APIs, Swagger/OpenAPI, GraphQL, Microservices, PostgreSQL, MongoDB, MySQL

Cloud & Delivery: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, EC2, S3, CloudFront, Route 53, RDS

PROFESSIONAL EXPERIENCE

Director & CTO | WebStack Labs

Vadodara, India | 21 Jun 2021 - Present

- Lead technology strategy, solution architecture, and end-to-end delivery for SaaS and enterprise software engagements.
- Current client engagement: Principal Software Engineer, It's All Savvy UK (from 1 Jul 2026), delivering end-to-end product engineering across architecture, frontend, backend, integrations, cloud operations, quality, and stakeholder collaboration.
- WebStack Labs is the legal contracting entity for the current It's All Savvy engagement.

SDE 3 - Product | Rishabh Software

Vadodara, India | Feb 2025 - 15 May 2026

- Led frontend architecture and delivery for a multi-tenant SaaS platform spanning task management, dashboards, workflow automation, collaboration, analytics, timeline, and Gantt modules.
- Established an Nx monorepo with 12+ shared UI/component libraries and designed a schema-driven Trigger-Condition-Action workflow automation builder.
- Optimized data-heavy task experiences using virtualization, viewport rendering, lazy loading, DOM optimization, image caching, and NgRx state improvements; performance-tested to 10K+ tasks.
- Integrated Angular applications with Java REST APIs via Swagger/OpenAPI, PostgreSQL-backed reporting/filtering, and Mixpanel analytics.

Technical Lead | Innovecture

Remote from Vadodara, India | Aug 2024 - Feb 2025

- Led cross-functional delivery of Angular, Node.js, and NestJS applications; guided architecture, code quality, and engineering practices.
- Built reusable Nx components and services, strengthened authentication/authorization, and improved performance through database query and indexing work.
- Mentored junior developers through reviews, knowledge sharing, and implementation guidance.

Full Stack Developer | It's All Savvy

London, United Kingdom / Remote | Sep 2021 - 30 Jun 2024

- Delivered product-facing applications using Angular, React, Java, MongoDB, and AWS in a high-ownership startup environment.
- Improved quality with Jasmine, Karma, Cypress, code review, and testing practices; partnered with stakeholders to deliver milestones reliably.
- Led and mentored engineers, managed AWS deployments, and improved platform reliability, cost efficiency, and delivery visibility.

Development Team Lead | Rishabh Software

Vadodara, India | Apr 2021 - Sep 2021

- Led Agile delivery, coordinated React, Angular, and Spring Boot implementation, and strengthened release quality through GitHub workflows and testing discipline.
- Delivered responsive web and Ionic-based mobile experiences; guided e-commerce and internal dashboard projects.

EARLIER EXPERIENCE

Senior Software Engineer | Rishabh Software
Vadodara, India | Apr 2019 - May 2021

- Migrated legacy AngularJS applications to modern Angular, improving maintainability through component-based and modular architecture.
- Improved code quality and delivery practices through refactoring, automated testing, CI, code review, and Agile collaboration.

Software Engineer | Rishabh Software
Vadodara, India | May 2016 - Mar 2019

- Built enterprise web applications with internationalization, modern UI improvements, testing, REST API integrations, cloud setup, and Power BI visuals.
- Contributed Angular upgrades, Node.js/MongoDB services, performance improvements, and technical roadmap inputs.

Trainee | Rishabh Software
Vadodara, India | 15 May 2015 - May 2016

- Completed structured software-development training and contributed to enterprise application development under engineering guidance.

Intern | Rishabh Software
Vadodara, India | 15 Dec 2014 - 8 May 2015

- Completed an internship preceding full-time employment with Rishabh Software.

EDUCATION

Master of Computer Applications (MCA) | ISTAR College, Gujarat Technological University, India | Dec 2015

Bachelor of Computer Science | N. V. Patel College of Pure & Applied Sciences, India | Dec 2012

SELECTED PROFESSIONAL HIGHLIGHTS

- Multi-tenant SaaS architecture supporting 100+ tenants, with shared frontend foundations across product modules.
- Schema-driven workflow automation that reduced implementation effort by approximately 60-80%.
- High-volume task experiences optimized for 3K+ production records and performance-tested to 10K+ tasks.
- AWS platform delivery across EC2, S3, CloudFront, Route 53, RDS, serverless functions, and CI/CD workflows.
