WWW: Bold Profile

Highly skilled Full Stack Developer with extensive expertise in React, Angular, JavaScript, TypeScript, HTML5, CSS3, Node.js, Java, J2EE, MongoDB, AWS, and more. Proven track record of successfully delivering end-to-end solutions for web applications. Proficient in creating dynamic and efficient front-end interfaces using React & Angular, while designing robust back-end systems with Node.js and Java. Experienced in database management with MongoDB, PostgreSQL and deploying scalable application on AWS. Adept at problem-solving and collaborating with cross-functional teams to deliver high-quality software products.

Skills

- Angular, Ionic, React, JavaScript, TypeScript, Next JS, HTML5, CSS3, UX Designing, Responsive Web Design, Tailwind, Material UI, Bootstrap UI, UI Design & Development, Consuming APIs, Front-End Development
- Node.js, Nest JS, Swagger UI, GraphQL
- Java, J2EE, Spring Boot, Tomcat, Nginx
- Kubernetes, Jenkins, Docker, CI/CD
- MongoDB, MySQL, PostgreSQL, MEAN Stack, MERN Stack, Firebase, Supabase
- AWS(EC2, S3, Cloud Front, IAM, EFS, Elastic Beanstalk, Amplify, Route53)
- Git, GitHub, Jira, Confluence
- AI Integration (Chat GPT, Copilot, Code Rabbit)
- Technology Resource Integration
- Functional Requirements Expertise
- Team Performance Management
- Team Leadership
- Solution Architecture
- API Design and Development
- Object Oriented Design, Design Patterns, System Architecture
- Interpersonal Communication, Leadership Experience, Mentoring , adaptability, Collaboration, Problem Solving

Work History

SDE 3

Rishabh Software, Vadodara, India

February 2025 - Current

- Owned frontend architecture and delivery for a **multi-tenant SaaS platform (100+ tenants)** across **6+ core modules** (Task Management, Dashboard, Collaboration, Analytics, Workflow Automation UI,

Timeline/Gantt), supporting **5K+ daily active users**.

- Established an **Nx monorepo** with **12+ shared UI libraries/components**, reducing duplicated implementation and accelerating delivery of new UI features across modules.
- Architected a **schema-driven, drag-and-drop Workflow Automation Builder (Trigger-Condition-Action)**, enabling addition of new automation types primarily via **schema/config changes**, cutting development effort by **~60-80% per new automation type**.
- Delivered workflow builder UX with **dynamic forms + reusable configurators** and reliable schema serialization/deserialization, reducing workflow configuration issues and improving end-user success in workflow publishing.
- Optimized data-heavy task experiences handling **3K+ tasks per list view**, enabling smooth interaction using **viewport-based rendering + DOM optimization + virtualization**, improving responsiveness under load (**up to ~2-4x smoother scrolling** for large lists).
- Implemented performance enhancements including **image caching + image optimization**, reducing redundant image loads and improving page/board load responsiveness for asset-heavy screens (**up to ~30-50% reduction in perceived load time** for repeated navigations).
- Improved application state performance via **NgRx store optimization** (selector tuning, reduced rerenders, state normalization), lowering unnecessary change detection cycles and improving UI stability on heavy dashboards and boards.
- Strengthened platform observability and integration by consuming **Java REST APIs** via **Swagger/OpenAPI**, supporting **PostgreSQL-backed filtering/reporting workflows**, and implementing **Mixpanel tracking for key funnels**, ensuring accurate instrumentation for product insights.

Technical Lead

Innovecture, Remote

August 2024 - January 2025

- Improved systems with addition of new features and infrastructure.
- Teamed on development of technology roadmap spanning 2 years.
- Provided educational expertise and mentoring to junior team members.
- Rapidly prototyped new data processing capabilities to confirm integration feasibility into existing systems.
- Consulted with engineering team members to assess system loads and developed improvement plans using technologies such as Angular, Node.js, resulting in a 25% improvement in system performance and scalability.
- Maintained complex technology infrastructure and implemented new features in collaboration with the product team, leveraging AWS services to achieve a 30% increase in user engagement.
- Discussed project progress with customers, collected feedback across different stages, and addressed concerns promptly, achieving a 95% client satisfaction rate and repeat business.
- Led version control efforts using GitHub and other repositories, reducing merge conflicts by 40% and improving code collaboration efficiency.
- Managed projects using Jira and documented project details in Confluence, enhancing project tracking accuracy and reducing project delivery time by 20%.
- Collaborated with the product team to strategically plan for future products, driving innovation and contributing to a 15% increase in product revenue.
- Implemented Angular and React components to enhance frontend interactivity and user experience, resulting in a 20% reduction in bounce rates.
- Developed scalable backend solutions using Node.js, integrating with AWS Lambda functions to optimize serverless architecture and reduce operational costs by 25%.
- Managed application deployment on AWS, leveraging services like EC2, S3, Cloud Front, Route53, Amplify and RDS, achieving 99.9% uptime and improving scalability and performance.

Front End Development Head(Remote)

It's All Savvy, London, England, United Kingdom

September 2021 - July 2024

- Collaborated with product managers, UX/UI designers, and backend developers using Agile methodologies such as Scrum and Kanban to create seamless and user-friendly web applications, leading to a 2X growth in revenue within two years.
- Implemented and maintained high standards of code quality through rigorous testing with Jasmine and Karma, thorough code reviews, and adhering to coding standards, reducing bug occurrence by 40% and enhancing application stability.
- Optimized applications for maximum speed and scalability by addressing performance issues, implementing data handling techniques such as lazy loading, efficient caching, and code splitting, resulting in a 35% decrease in load times.
- Integrated front-end components with server-side logic using Node.js, Java, and RESTful APIs to ensure seamless data flow and functionality in a high-traffic platform, improving transaction speed by 25%.

Development Team Lead

Rishabh Software, Vadodara, Gujarat, India

April 2021 - September 2021

- Actively participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives, implementing Scrum principles that led to a 30% improvement in project efficiency and a 20% reduction in delivery times through enhanced team collaboration and continuous improvement.
- Ensured applications were responsive and optimized for various devices and screen sizes, using responsive design frameworks and media queries, improving user experience and increasing mobile traffic by 50%.
- Managed technological frameworks like React/Angular/Spring boot and version control via GitHub, collaborating with the product team on new features, conducting thorough testing, and ensuring smooth integration and deployment of updates, reducing deployment errors by 30%.
- Added Ionic for mobile app development, creating cross-platform applications that improved user engagement by 25% through optimized performance and seamless integration with existing web technologies.
- Led multiple projects, including an e-commerce platform and an internal dashboard, using Agile methodologies such as Scrum to enhance team productivity and project delivery speed by 25%.
- Stayed up-to-date with the latest Angular developments and industry trends, applying new techniques and best practices that improved development processes, resulting in a 15% increase in application performance.

Senior Software Engineer

Rishabh Software, Vadodara Area, India

April 2019 - May 2021

- Successfully migrated existing applications from AngularJS to Angular, enhancing application performance by 30%, user experience, and maintainability through improved component architecture and code modularity.
- Collaborated with project managers to define coding objectives for software projects, implementing best practices such as code reviews and pair programming, which resulted in clearer goals and a 20% increase in code quality output.
- Enhanced legacy code to reduce expenses and improve functionality through comprehensive refactoring and optimization. Introduced new code review techniques, including automated testing and continuous integration, resulting in a 20% increase in productivity through effective on-site software testing.
- Adhered to Agile practices, including sprint planning, daily stand-ups, and retrospectives, to enhance project efficiency. These practices resulted in better team collaboration and a 15% reduction in

project delivery times.

Software Engineer

Rishabh Software, Vadodara Area, India

January 2015 - March 2019

- Enhanced business software by implementing international language support, collaborating on modern UI design, conducting comprehensive testing, and setting up code coverage, resulting in improved functionality and user satisfaction.
- Developed and implemented Angular upgrades, custom solutions, and REST APIs. Set up cloud infrastructure, applied compression techniques for better performance, created Power BI visuals, and mapped technology progress, enhancing overall system performance by 25%.
- Ensured effective communication among team members and stakeholders, reducing errors by 20% through regular meetings, clear documentation, and the use of collaboration tools like Jira and Confluence.
- Provided strategic insights for feature development by analyzing user feedback and market trends, which led to enhancements in product functionality and user experience, increasing user satisfaction by 15%.

Education

Master's Degree in Master of Computer Applications - MCA December 2015

ISTAR College - Gujarat Technological University at Gujarat, India

Bachelor's Degree in Computer Science December 2012

N V Patel College of Pure & Applied Sciences at Gujarat, India
