

Amit Mahida

Senior Full Stack Architect | Frontend Architecture Leader | SaaS Platform Engineering

Vadodara, Gujarat, India | +91 89057 21492 | amit.mahida9292@gmail.com

linkedin.com/in/amit-mahida | amitmahida.dev

Professional Summary

Senior Full Stack Architect and Engineering Leader with 11+ years of experience designing, modernizing, and delivering enterprise web applications, multi-tenant SaaS platforms, and scalable frontend/backend systems. Expertise across Angular, TypeScript, JavaScript, Node.js, Java, REST APIs, PostgreSQL, AWS, Docker, CI/CD, Microservices, System Design, and Performance Optimization. Proven ability to own architecture decisions, lead engineering teams, improve scalability, mentor developers, and partner with product, UX, backend, and customer stakeholders to deliver business-critical platforms. Experienced in AI-assisted engineering workflows using ChatGPT, GitHub Copilot, and CodeRabbit.

Core Skills

Technical Leadership: Engineering Leadership, Solution Architecture, System Design, Technical Roadmaps, Team Leadership, Mentoring, Agile/Scrum, SDLC, Release Planning, Stakeholder Management

Frontend: Angular, Angular 17+, TypeScript, JavaScript, RxJS, NgRx, React, Next.js, Ionic, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, Responsive Design, Virtual Scrolling, Frontend Performance Optimization

Backend & APIs: Node.js, NestJS, Java, J2EE, Spring Boot, REST APIs, Swagger/OpenAPI, GraphQL, API Design, Microservices

Cloud & DevOps: AWS, EC2, S3, CloudFront, IAM, EFS, Elastic Beanstalk, Amplify, Route 53, Docker, Kubernetes, Jenkins, CI/CD, GitHub

Databases & Platforms: PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Enterprise SaaS, Multi-tenant Architecture, Distributed Systems, Scalable Web Applications

AI & Automation: AI-assisted Development, ChatGPT, GitHub Copilot, CodeRabbit, Workflow Automation

Professional Experience

Rishabh Software - SDE 3 / Senior Full Stack Architect

Vadodara, India | February 2025 - Present

- Own frontend architecture and delivery for a multi-tenant SaaS platform serving 100+ tenants across Task Management, Dashboards, Collaboration, Analytics, Workflow Automation, Timeline, and Gantt modules.
- Architected an Nx monorepo with 12+ shared UI libraries and reusable components, reducing duplicate implementation and accelerating feature delivery across product modules.
- Designed a schema-driven drag-and-drop Workflow Automation Builder using Trigger-Condition-Action patterns, enabling new automation types through configuration-first development and reducing implementation effort by approximately 60-80%.
- Built dynamic forms, reusable configurators, and reliable schema serialization/deserialization workflows, improving automation publishing accuracy and reducing workflow configuration issues.
- Optimized data-heavy task views supporting 3K+ records per list through virtual scrolling, viewport-based rendering, DOM optimization, and state decoupling, improving large-list responsiveness by approximately 2-4x.
- Improved asset-heavy screen performance through image caching and optimization strategies, reducing perceived load time for repeated navigation by approximately 30-50%.
- Tuned NgRx state management through selector optimization, state normalization, and reduced rerender patterns, improving dashboard and board stability under heavy data loads.
- Integrated Java REST APIs through Swagger/OpenAPI contracts, supported PostgreSQL-backed reporting/filtering flows, and implemented Mixpanel instrumentation for product analytics and funnel visibility.

Innovecture - Technical Lead

Remote | August 2024 - January 2025

- Led technical delivery for Angular, React, Node.js, and AWS-based application initiatives, balancing feature delivery, infrastructure improvements, and scalability goals.
- Partnered on a two-year technology roadmap, aligning engineering priorities with product strategy, modernization opportunities, and platform growth needs.
- Mentored junior engineers through code reviews, architecture discussions, implementation guidance, and delivery planning.
- Prototyped data-processing and integration capabilities to validate feasibility before committing engineering capacity to production implementation.
- Assessed system load patterns and delivered Angular/Node.js optimization plans that improved performance and scalability by approximately 25%.
- Modernized AWS-based infrastructure and product features in collaboration with product teams, contributing to a reported 30% increase in user engagement.
- Managed customer-facing progress discussions, feedback loops, and issue resolution, supporting 95% client satisfaction and repeat business.
- Improved GitHub-based collaboration practices, reducing merge conflicts by approximately 40% and strengthening code review effectiveness.
- Used Jira and Confluence to improve planning visibility, delivery tracking, and documentation quality, reducing delivery timelines by approximately 20%.
- Developed scalable Node.js backend solutions and integrated AWS Lambda functions to improve serverless architecture efficiency and reduce operational costs by approximately 25%.
- Managed AWS deployments across EC2, S3, CloudFront, Route 53, Amplify, and RDS, supporting 99.9% uptime targets and improved scalability.

It's All Savvy - Frontend Development Head

London, United Kingdom / Remote | September 2021 - July 2024

- Led frontend engineering for product-facing web applications, partnering with product managers, UX/UI designers, and backend teams across Scrum and Kanban delivery models.
- Drove frontend architecture, implementation standards, and delivery execution that contributed to 2x revenue growth over two years.
- Established code quality practices using Jasmine, Karma, code reviews, and frontend engineering standards, reducing production bugs by approximately 40%.
- Improved application speed and scalability through lazy loading, caching, code splitting, and performance-focused data handling, reducing load times by approximately 35%.
- Integrated frontend applications with Node.js, Java, and REST API services, improving data flow and transaction speed by approximately 25% on a high-traffic platform.
- Guided frontend delivery priorities, implementation decisions, and team execution to improve user experience, maintainability, and release confidence.

Rishabh Software - Development Team Lead

Vadodara, India | April 2021 - September 2021

- Led Agile delivery across sprint planning, daily standups, retrospectives, and continuous improvement practices, improving project efficiency by approximately 30% and reducing delivery time by approximately 20%.
- Delivered responsive web applications across desktop and mobile experiences, improving mobile traffic by approximately 50%.
- Managed React, Angular, and Spring Boot implementation efforts, coordinating product features, testing, integration, and deployment activities.
- Improved release quality through GitHub workflows, testing discipline, and deployment coordination, reducing deployment errors by approximately 30%.
- Introduced Ionic-based cross-platform mobile development, improving user engagement by approximately 25% through integrated web and mobile experiences.
- Led delivery of e-commerce and internal dashboard projects, improving team productivity and project execution speed by approximately 25%.
- Applied modern Angular practices and frontend optimization techniques, improving application performance by approximately 15%.

Rishabh Software - Senior Software Engineer

Vadodara, India | April 2019 - May 2021

- Migrated legacy AngularJS applications to modern Angular, improving performance by approximately 30% while increasing maintainability through component-based architecture and modular code structure.
- Collaborated with project managers and engineering teams to define implementation objectives, coding standards, and review practices, improving code quality by approximately 20%.
- Refactored legacy codebases to reduce maintenance effort, improve functionality, and increase long-term extensibility.
- Introduced automated testing, CI practices, and improved code review techniques, increasing development productivity by approximately 20%.
- Applied Agile delivery practices across sprint planning, standups, and retrospectives, improving collaboration and reducing delivery timelines by approximately 15%.

Rishabh Software - Software Engineer

Vadodara, India | January 2015 - March 2019

- Built and enhanced enterprise business applications with internationalization support, modern UI improvements, comprehensive testing, and code coverage practices.
- Delivered Angular upgrades, custom application features, REST API integrations, cloud infrastructure setup, compression techniques, Power BI visuals, and technology roadmap inputs, improving system performance by approximately 25%.
- Strengthened team and stakeholder communication through regular updates, documentation, Jira, and Confluence, reducing delivery errors by approximately 20%.
- Analyzed user feedback and market trends to inform feature improvements, increasing user satisfaction by approximately 15%.

Education

Master of Computer Applications (MCA), ISTAR College - Gujarat Technological University, India | December 2015

Bachelor of Computer Science, N V Patel College of Pure & Applied Sciences, India | December 2012
